

Lesson 2 Reflections

Name: _____

STEM Explorer Carnival Tycoon Project

Directions: Answer the following discussion question upon completion of Lesson 2.

Use what you have learned in Lesson 2 to evaluate the following scenario: Jim rolls a 6-sided die 6 times and gets the following results: 1, 3, 3, 5, 6, 1. He determines two things: 1. The likelihood of rolling a 1 or a 3 on this particular die is higher than the other numbers. And 2. It is not possible to roll a 2 on this particular die. The die must be loaded.
